

Image Manipulation

Do as PC model for image editing and also explain about Pixel, zoom and dimension and aspect ratio.

Resize and Compress:

There are many tools available on online to resize the images.

Or click this link <https://www.simpleimageresizer.com/>

And upload the image and the resize and compress as much you need.

The screenshot shows the Simple Image Resizer website interface. At the top, there is a navigation bar with the following items: Simple Image Resizer, Image Resizer (underlined), Compressor, Converter, More Tools (with a dropdown arrow), Become a Tester (in a blue button), and For Business. Below the navigation bar, there is a main content area with a white background. On the left, there is a text input field labeled "Select image from computer" and a blue button labeled "Select image". Below this, there is a section titled "Define the new size of your image using:" with two radio buttons: "Percentage (%)" (selected) and "Dimensions (px)". Below the radio buttons, there is a horizontal slider with a blue handle. Below the slider, there is a text label "make image 50 % smaller" and a green button labeled "Resize". On the left side of the main content area, there is a grey box with a green icon and text: "Simple Image Resizer ask for your consent to use your personal data to:" followed by a bulleted list: "Enables storage, such as cookies, related to advertising" and "Enables storage, such as cookies, related to analytics (eg. visit duration)". Below this, there are two more grey boxes: "Prepare Images For Social Media" with the subtext "photos to current Social Medias standards." and "Resize Image To Kb / Mb" with the subtext "Resize photos to given file size online for free."
