How to Check the RAM usage in Android

Steps 1

Go to the home screen. Unlock your phone and navigate to the home screen. In Android Nougat, tap on the ^ icon at the bottom of the screen. In older versions, just tap the Apps to view the home screen.

Steps 2

Open Settings app. Tap on the Settings app with a white gear icon from the menu. If you can't find it, use the search bar at the top.

Steps 3

Go to the application manager option. You will see Apps on the Device section. Just tap it to open it.

	Sound Volume, vibration, Do Not Disturb	
	Storage	

If you are using an old version of Android, you will see Application, instead of "Apps". Also, you need to select Application manager from there.

Steps 4

Select Show system or Show system apps from there. Now you will see the whole system apps on there.

Steps 5

Done, Just select AndrOpen Office \rightarrow click Storage & cache options. Than App size, User data, Cache, Total.
