Presentation

Create groups of 5 or 6 children. Group may vary depending upon the strength of students and number of computers available.

- Select the topic from their own textbook for each class. It will differ according to the class. For eg:6th std, I term, prose-1 "The Green sea turtle".

- Teacher should download the pictures for the lessons to be given and should be saved in local folder such as pictures or downloads. It should be done by the teacher on beforehand before entering the class.
- Ask the students to create a new presentation in open office.
- Insert 4 to 5 slides for this topic and ask the students to type the topic in first slide using font work gallery.
- There are different master pages and ask the students to insert as they like and then insert the given pictures in each slide and type the contents for each picture as given in the text book.
- Ask the students to give slide transition for each slide in different ways.
- If time permits, we can use the custom Animation also.
- Ask the students to play the slide show by pressing F5.

- **Android tablet/phone.**

- Install the OpenOffice and do the PC model.
