

## Website Creation for Windows

- Computer: Open the Start Screen (the window symbol at the bottom left on your screen, In tab you can search the notepad). Type Notepad or notepad++

Example of HTML page structure

- You can add the picture in this HTML as follows:

You can use this tag for reference. You can change the height, width as you want. (Note: HTML file and picture both have to be in the same folder)

```

```

- Optional Depending upon the class

Here are the more tags for style you may try:

```
<p style="color:red;">This is a red paragraph.</p>
```

```
<h1 style="font-size:60px;">Heading 1</h1>
```

```
<body style="background-color:powderblue;">
```

```
<h1 style="background-color:powderblue;">This is a heading</h1>
```

```
<p style="background-color:tomato;">This is a paragraph.</p>
```

```
<h1 style="font-family:verdana;">This is a heading</h1>
```

`<p style="font-family:courier;">This is a paragraph.</p>`

`<h1 style="text-align:center;">Centered Heading</h1>`

`<p style="text-align:center;">Centered paragraph.</p>`

- Formating:

- `<b>` - Bold text

- `<strong>` - Important text

- `<i>` - Italic text

- `<em>` - Emphasized text

- `<mark>` - Marked text

- `<small>` - Smaller text

- `<del>` - Deleted text

- `<ins>` - Inserted text

- `<sub>` - Subscript text

- `<sup>` - Superscript text

- Finally save the file

Save the file on your computer. Select File > Save in the Notepad or Notepad++.

- Name the file "index.html" and set the encoding to UTF-8 (which is the preferred encoding for HTML files). Then do double click on the HTML file and view the web page

- Later Upload the file to the server and see the website that was created using the browser from any machine.
