

# EXERCISE 2 Solution

## How to change your photo's aspect ratio

1. Go to this web page “[click Here](https://imagy.app/image-aspect-ratio-changer/)” or <https://imagy.app/image-aspect-ratio-changer/>
2. Upload your image.

Upload your desired image from your own photo library or start with a stock photo from the Adobe Express libraries.

3. Resize your image.

Select the resize tool to change the shape and size of your canvas.

4. Choose an aspect ratio option.

Under the resize options, you'll see Standard sizes which highlight the most commonly used aspect ratio options. Choose the size that best fits your destination.

5. Adjust the framing of your photo.

Tap or click to select your photo. When the Edit Image menu appears, use the sliding Size tool to zoom in or out, the Rotate option to align your image, and then drag your image as needed to perfectly frame your subject.

6. Instantly download your new image.

Hit that download button to save your newly cropped photo to your device. Upload images as much as needed to resize different aspect ratios and publish your content across all your channels.
